UI/UX Analysis

Beta Testing

Cybersecurity

EDUCATION HIGHLIGHTS

LAUTECH
B.Tech Cybersecurity
CGPA: 4.46 / 5.00

ADEBAYO
SAMSON AYOMIDE
Frontend Developer & QA Specialist

Professional Summary

A results-driven **Frontend Developer** and **Cybersecurity** undergraduate at LAUTECH with a **4.46 CGPA**. Specialized in creating responsive web interfaces and performing **Testing**. Expert at bridging the gap between clean code and user-friendly navigation. Ensuring all digital products are bug-free and intuitive for the final user.

Key Project

Functional Arithmetic Engine (Calculator)
JavaScript, Bootstrap 5, CSS3

- Developed a precision-based calculator handling complex arithmetic operations using **Vanilla JavaScript**.
- Designed a mobile-first, responsive interface with customized **Bootstrap** grid system.
- Achieved seamless deployment via **Vercel** with optimized performance scores.

Professional Experience

Beta Tester & Quality Assurance (QA) Analyst
Freelance / Independent

- Perform rigorous **Beta Testing** for web applications to identify technical bugs and usability issues.
- Evaluate **UI/UX Navigation** flow to ensure the environment is "friendly," easy to learn, and intuitive for users.
- Stress-test site responsiveness to ensure a high-quality experience on all screen sizes.
- Document and report navigation hurdles to developers to improve overall product quality.

Operations Assistant
Service & Inventory Management

- Manage inventory accuracy and safety protocols in a high-traffic service environment.
- Maintain high standards of detail in transactional reporting and customer service.

Professional Learning

Full Stack Engineering Certification
SQI College of ICT

Currently mastering the integration of backend technologies and database management systems, building on existing frontend expertise.
